DETAILED ACTION

Allowable Subject Matter

Claims 19-26 are allowed.

The following is an examiner's statement of reasons for allowance: The arguments filed in Applicant's appeal brief dated 5/17/05 are deemed persuasive. Specifically, Applicant argues, "[T]here is a significant difference between having to build up multiple layers of silicon and insulating material before any formation of electrical connections can begin, as disclosed by Finnila, as opposed to simply providing one of the first layers of the device (the first substrate) with active circuit components to define a first circuit layer as recited. Further, the first circuit layer (active circuit component) formed in Finnila is actually gate electrode 18 which is formed on top of first substrate 12 (see FIG. 5; col. 4, lines 28-30), but not along and within at least one portion thereof as recited. Depositing a circuit component on top of a first substrate to define a first circuit layer as disclosed by Finnila is not equivalent to the circuit component being along and within at least one portion of the first substrate to define a first circuit layer as recited." (page 13, Appeal Brief). This is determined to be persuasive. Consequently, claims 19-26 are deemed to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
